

## FILLER B

### Protein filler

#### CHEMICAL CHARACTERISTICS

<b>Appearance:</b>	Powder
<b>Colour:</b>	White
<b>Smell:</b>	Characteristic
<b>Active material:</b>	97,0 % +/- 2,0
<b>Charge:</b>	Anionic
<b>Insoluble:</b>	50,0 % +/- 1,0
<b>Humidity:</b>	2,0 +/- 1,0

#### PRODUCT CHARACTERISTICS

FILLER B is a filling product formulated using organic substances of vegetable origin and specific finely ground inorganic substances that can be used on all types of leather, both mineral and vegetable tanned.

It is compatible with all anionic-charged tanning and retanning products.

Due to its characteristics, FILLER B gives the leather a silky surface feel, fullness of the fiber and above all a unique uniformity of filling of the empty parts of the leather, thus reducing the phenomenon of blowing without hardening the finished article.

#### APPLICATIONS

FILLER B can be used in the retanning phase together with retanning products or during the fattening phase. To obtain the maximum filling effect we recommend mixing FILLER B in water at 50 °C and adding the suspension into the rotating drum.

In the fatliquoring phase, FILLER B can be used both together with the fatliquors and at the end of the rotation phase, leaving it to rotate for approximately 20 minutes before proceeding with the fixation.

The addition of formic acid to fix the fatliquor helps to improve the filling effect.

The quantities to be used vary from 2.0% to 4.0% depending on the characteristics of the leather and the finished article requested.

**Revision 08 of 26/08/2024**

Chemical-physical properties of the product have been determined in accordance with internal procedures by methods of analysis due to national and / or internationally recognised standards. The information contained in this data sheet are based on our current knowledge. Given the multiplicity of factors that can influence the processing and use of our products, the customer is obliged to carry out its part tests and controls. No responsibility can be taken by us for an incorrect use of the product
