

COMONT

Resin and filler compounds

CHEMICAL CHARACTERISTICS

Appearance:	fluid
Colour:	white
Smell:	characteristic
Dry residue:	24.0 – 26.0 %
pH (sol al 10%):	7.5 – 9.5
Charge:	anionic

PRODUCT CHARACTERISTICS

COMONT 15E is an aqueous compound that forms a soft and elastic film with excellent covering power. It is opaque, non-sticky and is used specifically for covering bases on both full-grain and buffed leathers, lending itself effectively to high-temperature printing and prolonged milling.

COMONT 15E has a smooth, soft hand with good elasticity.

APPLICATIONS

COMONT 15E is applied either by spray diluted 1:1 in water or with a roller coater with undiluted product.

COMONT 15E is used with the addition of pigment in a 6:1 ratio.

Revision 01 of 18/12/2024

Chemical-physical properties of the product have been determined in accordance with internal procedures by methods of analysis due to national and / or internationally recognised standards. The information contained in this data sheet are based on our current knowledge. Given the multiplicity of Factors that can influence the processing and use of our products, the customer is obliged to carry out its part tests and controls. No responsibility can Be taken by us for an incorrect use of the product
